

Scandoublery i flicker-fixery: DCE: Flicker Magic

Connection: Other

[Hi Res Version of Image 1 - 107K](#)

[Hi Res Version of Image 2 - ~1MB](#)

The Flicker Magic is a flicker fixer and scandoubler which is designed to be installed in an A1200 or A4000. There are two versions of this device, both have a main board which clips onto the LISA chip and one version has a second board which clips onto the Alice Chip and the other version externally connects to the 23-pin VIDEO port. The Flicker Magic is very similar to the Scan Magic, except the Scan Magic does not perform flicker fixing.
