

Sprzęt - inny: Proton Palace: Joyport Expander

Connection: Parallel Port

J.D.Robbins:

To: ian.chapman@amiga-hardware.com

I was browsing your Amiga hardware site. It's great!

I've included pictures of an Amiga parallel port joyport expansion

Sprzęt - inny: Proton Palace: Joyport Expander

adapter that allowed someone to play a '4 joystick game' such as Hired Guns etc.

This adapter allowed joystick 3 and 4 options to be enabled in many games of the day by plugging into the parallel port of the amiga.

It was designed by Proton Palace (J.D. Robbins was the circuit designer) circa 1993 and sold well.

I do hope you could add this Joyport Adapter hardware to your site under Misc Hardware.

Best regards,

J
